

**Name:** Ollie's Coffee Company

**Description:** This is a website for a theoretical coffee company. My goal is to implement a visual interactive menu with calories for mobile orders. Additionally I want to establish a brand with branding guidelines, fake merch and rewards. I'm going to include all the additional hallmarks a page should have like an about us page, retail locations, and "history" of the company. That is all and this is my fifth sentence, thank you.

**Pages:** Home, Menu, Rewards, About us, Merch

**Data:** usernames, passwords, orders, rewards/points
